These Belts are made from 32-ounce fabric, and new stock.

A. E. MICHAEL,
A GOOD PLACE TO TRADE.

Cash or Credit?

Every now and again the argument on Cash or Credit comes up, and of course it has supporters, pro and con. It's no use blinding one's eyes to the fact, says the Calgary Commercial Review, that the cash business is the ideal one. The reason it comes up again is due to the advt. of a harness dealer in a town near Calgary, who says: "It is with reluctance we announce we shall be unable to continue the granting of credit and shall have to place our business on a cash basis."

No doubt the success of another merchant in the same town who says It Pays to Pay Cash was the deciding factor in making the harness man change his style of doing business.

In another town a merchant was drawing the attention of the buying public to some grocery specials and he was certainly quoting attractive prices. He said: "If we were doing a long term credit business we could not sell on such close margin of profit."

Where credit is given and allowed to stand the profit is eaten up in outstanding accounts. Quick turnover means fresh stock and good values. The cash comes in and is used to advantageous buying, thus doing away with a bookkeeping and collection system.

It would not hurt merchants of Alberta if they all took the bull by the horns and "changed" their business to a cash basis.

Some of the larger stores in the cities like the "charge" system, but there is no denying that it is a rotten one.

In the last two months we have noticed at least nine stores in the smaller centres turning away from credits to cash—they realized they were dangerously near insolvency

Conservatives Select Leader.

Selecting of a new leader of the Conservative party in Alberta will take place at a convention to be held in the assembly hall of the Macdonald Hotel, Edmonton, at 2 p.m. on Wednesday, August 5. It is expected that delegates will be present from every riding in the province and full preparations made for a general campaign in the interests of the party.

While several names have been suggested, that of A. A. McGillivray, K. O. of Calgary, is most favorably mentioned in succession to W. J. Blair of Provost. There is strong support for Mr. McGillivray and should he be willing to stand, it is felt that he would probably be selected.

Over one hundred delegates will probably attend the convention as the basis is two for each riding that has a single member.

and saved themselves in time by their courage.

Owing to the cost of accommodation at the bank, merchants have to charge their customers a higher rate of interest for credit accommodation. In a good many cases their customers could borrow money directly from the bank and pay the merchant, saving two or three per cent on the money by doing so. Notwithstanding many rumours to the contrary, the Canadian Banks are still in the business of loaning money and do not often turn down the man whose credit is good and who wants the money for legitimate purposes.

It would be interesting to know how much money could be saved annually here in our own district by farmers and others, were real efforts made towards that end by all.

CLOSING NOTICES.

The business houses and the three elevators in Stony Plain close every Wednesday at 1 p. m. during August.

Stony Plain Postoffice will be closed Wednesday afternoon at 2 o'clock during August.

LOCAL NEWS.

Miss Viola Simonson, Winnipeg, is visiting this week with Mr and Mrs L. M. Larson Holborn.

Mr and Mrs Michael are leaving today on a motor trip to Lacombe, Stettler and Halkirk.

Dietrich Timm, from Wayne is visiting in town with Mike Ducholke.

Miss Maxine McCulla is under the doctor's care this week.

Mr Jack Krieger, of Portland, Oregon, is visiting here this week with his cousin, Mr John Schlitz.

John Klouze, from Kardiv, Russia, is visiting with his sister Mrs Eierstein, west of town.

W. Rother spent the week-end at Vermilion, looking for a farm.

Lawyer Wells, Edmonton, was a Stony visitor on Saturday.

A fishing party consisting of Messrs T. J. Hardwick, A. E. Michael, E. L. Outbie and S. C. Elliot motored to Peers over the week-end and succeeded in making a good catch.

A motor party headed by Mr Carmichael made a trip over the week-end thru the Rocky Rapids district.

Grade 12 results: Mabel Carr passed; Raymond Shaul conditioned in Algebra.

Two new copper wires are being strung on the right-of-way on the main line of the Canadian National Railway.

An East-bound train Friday morning ran into a horse on the rails in the local Railway yards, breaking a leg. The animal had to be destroyed.

While the dance was in progress in town Thursday night, some miscreant broke the glass windshield and one head light in the car belonging to Rudolph Goebel, which was parked on 2d Street east.

Stony Plain Women's Institute are holding their annual picnic at Edmonton Beach on Wednesday Aug 12. Cars will leave Stony Plain at 2.30 p.m. Miss McMill of the Department of Agriculture will give an address on the Girls' Camp at Banff.

The lawn party given Friday evening by the Ladies' Aid of the Union Church, on the parsonage grounds, was a very successful affair, quite a large number being in attendance.

Those in the district who have been waiting to secure a used car at their own price will have an excellent opportunity on Saturday afternoon next, at the auction sale of cars at Johnny Miller's Garage. Come, and get yours!

Cleans Like China

When you use S.M.P. Enamelled Ware Utensils, you never need to scrape, scour and scrub the way some vessels demand. Hot water, soap, a cloth—that's all you need to clean them. It washes like china, has the cleanliness and surface of china, but wears like steel. Don't be the slave of your cooking ware; equip with clean, pure sanitary, lasting.

ENAMELLED
WARE

A Shortsighted Policy

The shortsightedness of some people is proverbial, but it is truly amazing to find a whole generation of men numbering tens, if not hundreds, of thousands so afflicted. Yet the coal miners of the United States, Canada and Great Britain seem to be not merely temporarily but permanently incapable of seeing that they are surely destroying their own means of livelihood.

Thousands of miners are on strike in Nova Scotia, and now there is talk of another great strike on the part of the anthracite miners in the United States and rambles of another strike in the British mines. In no other industry has there been such continuous unrest and repeated strikes as among the coal miners. With what result? The miners themselves would be the last to say that their condition has been improved, while the consensus of opinion is that they are worse off than ever and their future prospects far from bright.

The fact is, and other people realize it if the miners themselves do not, that a very great change taking place in the world of manufacturing and in transportation to the detriment of the coal mining industry, and the untowardly difficulties and losses created by these frequent and prolonged miners' strikes are only serving to accentuate the problem confronting the coal mining industry and hastening the day when the miners will find themselves in a much more serious predicament than now against which they are making such bitter complaints.

The cost of mining and transporting coal, due largely to the high rates of wages paid the miners and increased freight charges resulting from the increase in wages paid railway operatives during the war, and which have not been much reduced, together with the rapid improvements effected in oil-burning machinery and the development of hydro-electric power plants, has resulted in a veritable industrial revolution.

One of the greatest developments taking place in the three English-speaking countries, and one calling for the investment of hundreds of millions of new capital annually, is in connection with water powers and the erection of huge hydro-electric stations generating hundreds of thousands of horse power. Manufacturing plants, finding the cost of coal mounting and their supplies periodically threatened through miners' strikes, are in ever increasing numbers, changing over from steam to hydro-electric power.

All over the continent, with cheap electric power, coupled with its convenience and absence of dirt, households are discarding the old kitchen range and installing electric ranges and electric appliances of all kinds.

Another and equally important change is being brought about through the conversion of coal-burning ocean and lake going vessels into oil-burners, while many of the new vessels building are being equipped to burn oil rather than coal. The internal combustion engine using gasoline is displacing the many small coal-burning steam plants everywhere.

In the effort to reduce costs and thus meet the increasing competition of motor cars and trucks, the steam railways are electrifying sections of their systems and extending the same from year to year, while railroads using electric power are spreading over the land.

These are significant happenings, but especially so to the coal operatives and miners. Yet the latter are apparently blind to a situation which threatens them, and instead of seeking co-operation with the mine owners in a determined effort to reduce the cost of coal to consumers, and guarantee a steady and assured supply at all times, they continue to make demands which the economic situation makes it impossible for the mine owners to accept, thereby increasing present difficulties, jeopardizing the industry in which they are engaged, and speeding up the movement to substitute oil, oil products and electric energy as the motive power in manufacturing industry, transportation and in home economies.

The miners are shortsightedly adopting the attitude of killing the goose that lays the golden eggs for them. Mines everywhere are only operating part time. There are more miners than there is employment for them, and in view of the impetus already given to the movement to substitute oil and cheaper forms of power for a haphazard and precarious supply of coal, the number of unemployed miners seems bound to increase. Strikes to enforce wage increases, and impose Union rules, "check-off" systems, and other arbitrary demands will only serve to further accentuate the miners' troubles, and cannot bring any permanent redress of grievances, imaginary or real.

A Good Reason

Rose came down the stairs looking particularly ravishing in a lavender bathrobe and lavender hat, and the girl who sat across the table opened fire.

"All dressed up in lavender! Wait until Mr. Smith sees you in that!" "Yes, just wait," was the lightly tossed-off answer. "And he likes lavender, too."

"So that's the reason you wear it?" "Oh, no!" replied Rose sweetly. "That's the reason he likes it!"—New York Sun.

Why He Did Not Bathe

I met a man who was just back from a coast resort, and asked him if he had enjoyed the sea-bathing. He fixed me with a glittering eye and said: "I did not bathe. Are you aware that the water in the sea has not been changed for fifty million years?" And what sensible man wants to immerse himself in a weak solution of drowned men? I wilted, but have some idea that these remarks were not original.—London Sunday Pictorial.

Earl Haig Is Color Blind

Earl Haig celebrated his sixty-fourth birthday on the day he sailed for Liverpool to Canada, to attend the conference of the British Empire Service League. It is not generally known that the great soldier is color blind. For that reason, it is alleged, he was refused entrance to the Staff College, and it was only after a great deal of common sense talk by Sir Redvers Buller, and Major-General McCalmont that he was at last admitted.

Minard's Liniment for Aches and Pains

Defence of Empire

Closer Relations With Dominions Upon Naval Policies Are Favored

During a debate in the British House of Commons on the naval estimates, Major L. Horo Bellah, Liberal, suggested that there should be a more intimate relationship between the Mother Country and the Dominions when the naval problems were settled.

The Dominions are not bearing their full share of responsibility in naval matters, Major Bellah said, not because they are unwilling to do so, because the problem probably has never been approached by them from a truly imperial point of view.

Major Bellah's remarks subsequently were endorsed by other speakers, including Mr. Lloyd George. The latter declared that if it were a question of the defence of the empire, the whole empire might share the burden thereof.

Earache, Toothache
Now Quickly Subdued

These are the sort of ills that call for a powerful and certain remedy. When your tooth is jumping, when you want ease and comfort in a hurry, you always get that quick relief from trusty "Nervine." Many who have proved the unfailing merit of Nervine call it "King over Pain." Certainly it is one that can be had without a bottle of this dependable medicine. Nervine is a protection against all the troubles such as earache, gas on the stomach, neuralgia, toothache, earache, etc. Get a 35c bottle from your dealer to-day.

Tourist Trade Increases

Canada's third largest industry, its tourist traffic, showed an increase of 60,000 in the national parks of Canada for 1924, according to the report of the commissioner. Banff and Lake Louise showed a combined advance of 15,000 visitors. At Banff, 1,693 parties were issued to camping parties.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent the dreaded summer complaints. They are at absolute safe medicine, being guaranteed to contain neither opiates nor narcotics or other harmful drugs. They cannot possibly do harm—they always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Britain Declines Proposal

Under the caption, "A Strange Request," the London Daily Telegraph says Great Britain has declined a proposal from the United States to appoint there a customs attaché, one of whose duties will be to investigate prices asked of American buyers by British exporters claiming the right to inspect the books of the British firms concerned.

A pleasant medicine for children is Mother Graves' Worm Expeller, and it is especially for driving worms from the system.

Silk in Sacramento

The Sacramento Valley, because of its uniformly mild climate, is believed to be ideal for the growing of silk worms and a large silk worm farm has been started near Oroville, Cal.

Prince George Will Stay

Takes His Chance in China Like Other Junior Officers

Those who have been expecting the recall of Prince George from China must be sadly ignorant of the traditions of our royal house. If the British naval forces are employed, the Prince will be with them, and will take the rough and tumble of it like any other junior officer. The King is quite alive to the dangers of the situation, but I should imagine that the recall of his son would be the very last wish of the Prince himself. In our royal family, at all events, things like that are just "not done."—Glasgow Herald.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

How Should I Wean My Baby?

This is a serious problem to many mothers. Weaning should always be done gradually, beginning about the seventh month, giving one or two bottle feedings during the day, increasing the number of bottle feedings gradually, until weaning is accomplished. Borden's Eagle Brand Milk is so like mother's milk in taste and ease of digestion that it can be given alternately with breast milk without causing abrupt weaning.

In this advertisement from time to time you will find an advertisement of Borden's Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company Limited, Montreal, and they will send you, free of charge, instructions for feeding your baby, and a Baby Welfare and a Baby Record Book. Or, just write the Company, mentioning this paper, and they will be sent.

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, sure and satisfactory relief.

Butter Production Increases

Considerable Increase Shown in Saskatchewan Production For May

Butter production in Saskatchewan during the month of May totaled 1,241,522 lbs., as compared with 940,941 lbs. in the same month last year, according to a report of the provincial dairy commissioner. Cumulative production for the first five months of the current year is 3,883,968 lbs., as against 3,322,094 lbs. in the corresponding period of 1923, an increase of 561,953 lbs.

Social Service

The call to social service is a call to self-sacrifice, and, if anything is to save this country from the disasters to which certain principles, preached today with the greatest fervor, would commit it, it is the generous service of those who reject the subtle temptation to devote themselves to a stubborn guardianship of their own special privileges.—London Daily Telegraph.

Won Wager By New Stunt

Arthur Riley, 27, recently pushed a truck on which a man rode a distance of 53 miles in 13 hours and 23 minutes. The total weight of the truck was 490 pounds. He did the stunt to win a wager.

Minard's Liniment for Corns and Warts

Germany Buys Canadian Wheat

German Consumption of Canadian Grain Is Heavy Says Report

The value of the German and continental markets with regard to the exportation of Canadian foodstuffs is being more than ever exemplified this season in the huge imports of grain and flour from the Dominion by the free port of Hamburg. In addition to more than 12,000,000 bushels of grain shipped from Montreal since the opening of navigation, Hamburg has received 6,014,431 sacks of Canadian flour in the period between September and June, and 1,000,000 sacks of wheat since the 1923-24 season.

Figures show that Montreal not only led all world ports in grain shipments, but also in flour exports. Although the threatened import tax on incoming flour by Germany undoubtedly has had a stimulus to that country, the fact is nevertheless apparent that German consumption of Canadian grains is very heavy. The aforementioned tax is to go into effect August 15.

Relieve Asthma at Once. If you could read the thousands of unsolicited letters received by the makers from grateful users, you too, would realize the remarkable powers of Dr. J. D. Kellogg's Asthma Remedy. All cases, incipient and chronic, are benefited by this great family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

Will Not Establish

Base At Esquimaux

British Government Denies Rumor of Naval Base on Pacific

The British Government has made no proposal looking to the establishment of a naval base at Esquimaux, B.C. This was stated officially at the department of national defence when attention was drawn to rumors that such a proposal had been made. It was stated that the point was raised from time to time in England that there should be a British naval base on the Pacific coast, but that nothing had been done. The Canadian Government now operates a naval dockyard at Esquimaux.

New Liverpool-London Highway

A 226-mile highway will be built in England between London and Liverpool at a cost of \$235,000 a mile. The road is to have no cross roads and will pass through no towns. It will be double, with a roadway for slow traffic and one for fast travel, with no speed limit on the section for fast going. A toll equivalent to a cent the ton will be charged.

Increasing Demand For Wheat In Markets Of The World Should Keep Grain Prices Firm

Mr. J. Obed Smith, former immigration commissioner for Canada in London, refers, in a letter to "Canada," the London weekly, to the growing production of foodstuffs in this country and the increasing demand for wheat from other countries—speaking of wheat, he says:

"Canada sells her wheat to Belgium, France, Holland, Scandinavia, Italy and Germany, besides the Old Land and the United States. Russia has recently placed an order and paid for 16,000,000 bushels of Canadian wheat. That is not all. The population of the states is rapidly increasing, despite the immigration quota, which prevents too many mouths arriving and needing imported food. This American market is nearest to Canada, and will be fed first."

"The Orient has suddenly discovered a liking for wheaten bread, and shipments of Canadian wheat across the Pacific Ocean have shown a large and rapid increase. What will be the immensity of the market if the teeming millions of China and Japan should generally adopt wheat instead of rice, which wheat can only be readily supplied by Canada? The states have no more land that can be profitably used for wheat growing; their average result per acre is far less than in Canada, while heavy overhead charges make it impossible to raise and sell wheat on equal terms with Canada."

"The day of export of wheat or flour from the United States is over. This is why the Canadian farmer has prepared more land for crop this year, and why so many American farmers are crossing the international boundary northward and buying better land than their own at one-third the price. The inexorable law of supply and demand governs the price of wheat, and while violent fluctuations have been lately the present market price is likely to be near the economic standard value of wheat for years to come. At that the Canadian farmer will profit."

Commenting on Mr. Smith's letter, "Canada" says that it came opportunely during Empire Shopping Week and that "in London in particular a commendable effort is being made by shopkeepers to bring empire products before the attention of the public. So far as Canada is concerned, the importance of encouraging the development of Canadian farming is obvious from our correspondent's letter. To call the Dominion—as has sometimes been done—the 'bread-basket of the world' is not so very far-fetched."

New Settler Satisfied

New Arrival From U. S. Likes This Country

In a letter to the Canadian Government agent at Portland, Maine, David M. Boyes, who recently settled at Meadow Lake, Sask., writes:

"We feel more than thankful for your assistance in getting us here. We like this country very well, and have never seen a place that produced grass like it does here. The horses are knee deep in wild pea-vine and vetch, besides plenty of natural grasses."

"I took a homestead, and it won't be hard to get 50 or 60 acres under cultivation. I am building with logs, having the help of two neighbors, and I can pay them back with labor."

"The soil here is a black vegetable loam and very rich. Water can be had at a depth of from 8 to 25 feet, besides there are numerous springs. I am more than satisfied with the place here and can recommend this place to anyone. There is good fishing and hunting, and if we can keep the weeds out we'll have one of the best districts in the west. We are all enjoying good health and have good appetites."

Highlighting in London

A delightful evening to his maid, and her answering trills, were heard by residents in Holloway in the north of London recently. The birds' setting in the branches of a tall tree in one of the gardens, and watching as they clearly through open places.

W. N. U. 1547

Canada's Apple Crop

Some districts in B.C. Show Reduction

Commercial apple prospects indicate a total crop of 95 per cent. of 1924, when 2,749,544 barrels were harvested, or 84.3 per cent. of a five-year average of 2,958,504 barrels, according to a crop report just issued by the department of agriculture.

The prospective commercial apple crop for British Columbia compared with 1924 indicates 90 per cent., or 2,027,000 barrels, or 85.5 per cent. of a five-year average, the report states. The slight reduction is caused by winter injury and the hot weather during the past month.

The great reduction in the apple crop is reported from Creston, Salmon Arm and the northern Okanagan districts where winter injury was most severe. Other districts such as the southern Okanagan, Kereemoo and Kootenay Lake, have prospects for increased yields or equal to last year's crop, which should balance the crop situation to the above figures.

Minerals in Rations For Hogs

Test at B.C. Experimental Station

Yielded Valuable Information
Valuable information relative to the importance of adding mineral matter to the usual grain rations of hogs has been secured at the Agassiz, B.C., experimental station during the last two winters, is the information contained in a recent "Experimental Farm Note," by W. H. Hicks, the superintendent of the farm.

The mineral ration used was composed of ground bone meal, 9 pounds; ground charcoal, 5 pounds; ground rock phosphate, 5 pounds; and salt, 3 pounds at a cost of 2.7 cents per ration. It was fed at the rate of 5 pounds to each 100 pounds of meal.

In order to test this material, a total of 31 pigs were divided into fourteen lots of six pigs each. In every ration where the mineral mixture was fed increased gains were secured.

When other mineral matter is not available, ordinary wood or coal ashes thrown on the floor gives good results.

Wolf Habits and Importance

Interesting Booklet Which Can Be Obtained Free

Accounts of wild life and descriptive history of such animals are always interesting, particularly so when commercialism is involved. Of this nature is Mr. Norman Criddle's, "The Habits and Economic Importance of Wolves in Canada," published by the department of agriculture at Ottawa, and which can be had free on application to the publications branch there.

Last winter it will be remembered wolves were particularly prominent in the public mind, partly owing to their boldness and partly due to the formation of large hunting parties to pursue them. Mr. Criddle tells of grey wolves, Arctic wolves, timber wolves and coyotes, describing their habits, methods of feeding and economic status. He also tells what farmers and outlying settlers most want to know, how the animals can be trapped, poisoned or otherwise destroyed and how the skins can be preserved.

The Office Boy's Wish

"It's like to go to a funeral this afternoon, sir," said the office boy after an argument with the chief clerk.

"Oh, you would, would you?" the chief clerk replied heartlessly. "Well you won't!"

"No, sir. I know I won't," the boy murmured. "But I would like to go all the same."

Something tragic and appealing in the youthful voice led the chief clerk to ask: "Whose funeral?"

"Yours, sir," said the boy gently.

Can Photograph Whizzing Bullet
Discovery of a mysterious ingredient in gelatine which may make it possible to catch a picture of a bullet whizzing through the air, has been disclosed by Dr. A. H. Lambert, a photography scientist. The substance found in extremely minute quantity in gelatin, increases the sensitivity of ordinary photographic film more than a hundredfold, it is said.

World Forestry Congress

Important Event to Be Held of Rome Next Year

Representatives of university forestry departments, schools of forestry and forestry associations from the four corners of the globe are to meet in Rome at an international forestry congress lasting from April 29 to May 8. "Those responsible for the congress," say the advance notices, "trust that they will be able to bring together in Rome forestry experts representing all civilized countries, so that with their collaboration a strong stimulus may be given to the advance of forestry throughout the world, and renewed confidence may be felt in the future of the forest, which is a factor of such importance in human activity and industry." An international forestry exhibition of wood working machinery and general forestry products is being included in the congress plans.

Winnipeg Pulp Mill

Mammoth Paper Mill May Be Erected If Power Rights Are Secured

Assurances that they were prepared to go ahead immediately with the construction of a \$5,000,000 paper mill of 250 tons capacity in the Great Winnipeg district, provided the Dominion Government entered into a contract providing pulpwood and waterpower rights, were made by George M. Seaman, of the Seaman Paper Company, Chicago, and E. W. Backus, of the Backus-Brooks interests in Canada and the United States.

The assurances were received with the utmost enthusiasm by the 300 representative men of Greater Winnipeg and other parts of the province present at a meeting called by Mayor Webb.

Suggests Colony Plan

Lord Mayor of Hull Makes Suggestion Re Emigration

Speaking to a gathering of Canadian and Newfoundland representatives in connection with Hull's civic period at Wembley exhibition, the Lord Mayor of Hull suggested that his city should adopt in each colony some place, village, or centre toward which Hull's colonial relationship should be centralized and mainly directed. He said it seemed that our system of emigration was probably too diffuse and visionary. If their emigrants went to some definite district, and if some tangible and concrete scheme was devised, he thought they might assist migration of very desirable colonists.

Interesting Documents Found

An ancient tax bill described on tablets unearthed in Babylon, are on display in Cleveland. The tax bill is over 4,000 years old and dates back to 2250 B.C. There is also an inventory for sheep delivered for sacrifice, a business document believed to have been written during the life of Abraham, and a document dated 538 B.C. during the reign of Nabonidus, the last king of Babylon.

Tourists For Canada

Nearly 20,000 people had booked for the "See for yourself" excursions to Canada, which began to run from British and French ports in July. Passengers included retired military men and civil servants, school teachers and hundreds of sons of farmers.

Party Of American Visitors Are Greatly Impressed With Trip Through Western Canada

Livestock Markings In 1924

Fifth Annual Report is issued At

A vast deal of information is contained in the fifth annual report on the origin and quality of commercial livestock marketed in Canada, recently published by the livestock branch at Ottawa and which can be had of the publications branch there. An innovation is the inclusion of maps of each province, by which the most prolific sections of production can be identified. It is interesting to note that the finished half-weight steers, and steers of export weight and quality suitable for the British market were turned out in increasing numbers in 1924 and that all the five provinces follow with names: Quebec, Ontario, Alberta, Saskatchewan and Manitoba, contributed to this desirable increase, being thus instrumental in improving Canada's position on a quality basis.

Improvement was observable in the quality of the exceptionally heavy marketing of calves. There was a record output of hogs, and, as the report states, there is much satisfaction in the fact that the extensive movement was not, as is generally the case, accompanied by any deterioration in quality. "Fortunately," also says the report, "under the hog grading policy, we are able to give direct shipments to packing plants, by grades." A table is given showing the number of each grade shipped to the plants during the year, by which it appears that the percentage of selects shipped by each province, first to packing plants, and secondly to stockyards, were as follows: Alberta, 2.8 and 3.2; Saskatchewan, 2.94 and 3.25; Manitoba, 3.18 and 4.91; Ontario, 21.58 and 24.41; Quebec, 10.42 and 9.62.

Award Farming Scholarships

Provide Tuition in Canadian College For English Boys

A London cable states that of the fifty scholarships tenable at agricultural colleges in Canada which the Fellowship of the Empire Exhibition is proceeding to allot, twenty-five already have been allotted to London. The others will be distributed in Scotland and among English provincial districts. Each scholar will be provided with a free passage to Canada, education and maintenance for a year and will afterwards be found suitable employment on the land in Canada.

Oil From Crickets Valuable

Very valuable oil, suitable for aviation since it does not congeal even at a very high altitude, can be made from crickets, according to advice received at Washington by the department of commerce from Algeria. Recently, about eighteen tons of crickets were sent to Holland from Algeria. Part of this quantity was fed to poultry and from the remainder oil was extracted.

The fortune that William Hobson-Loren has stored away was doubtless saved for a rainy day.

TAKING A JUMP IN THE LAKE

Cool weather was not sufficient to deter the Canada's Weekly Newspaper party from enjoying a dip in the waters of Lake Winnipeg when the party visited Grand Beach on the Saturday following their annual convention at Winnipeg. The spacious

sands tempted many of the more hardy ones to don bathing suits, while at the same time a splendid orchestra, in the large dancin' pavilion soaked shufflin' feet into real snappy fox trots and one steps.

The prosperity of western Canada:

excellence of growing crops and splendid farming methods followed throughout Manitoba and Saskatchewan was an eye-opener to the party of United States land agents, recently taken on a tour of parts of Manitoba and Saskatchewan, by Dan M. Johnson, western manager of agriculture and colonization for the Canadian National Railways. On their return to Winnipeg, the members of the party, numbering twenty-two from across the border, were most enthusiastic in their praise of the country they had visited, and were loud in their expressions of appreciation for the hospitality shown them by residents of the various districts visited.

The tour took them from Winnipeg through Dauphin, Melfort, Wadena, Prince Albert, Saskatoon, Estevan, Kelowna and through the famous Goose Lake and Snipe Lake districts. At Dauphin they enjoyed a full day's drive through the surrounding territory and were entertained at luncheon by the board of trade. At Saskatoon the party visited the forestry farm and the university and also enjoyed a five hours' drive as well as being entertained at luncheon. In the Goose Lake and Snipe Lake districts they made a drive of 185 miles, while in Wadena and Kelowna districts the party drove over 125 miles in their inspection of farms and vacant lands, being later entertained by the Wadena and Kelowna boards of trade.

On their return to Winnipeg and their later departure for the United States, members of the party were loaded down with samples of grain, vegetables, alfalfa, etc. which they had gathered at different points. They reported having picked up excellent mastic strawberries at Dauphin and Estevan and were surprised to find this fruit producing so well in western Canada. Nebraska and Illinois agents were particularly impressed with the type of beef cattle and horses best raised in western Canada, which, they believed, were better than anything produced in their parts of the United States.

Before their departure for their homes in the United States, the members of the party presented a resolution of thanks to Mr. Johnson and to Capt. L. B. Boyd, Canadian National representative, at St. Paul, thanking them for the opportunities which had been afforded of visiting western Canada and seeing for themselves what was offered here in the way of homes for prospective settlers. The resolution states: "We have seen much of western Canada, and we have seen beautiful and beautiful land. We have met many of our neighbors to the north. We have been on foreign soil for many days, but we have at no time on our trip had that feeling of a foreigner in a foreign land. We have felt that we were at home and among friends throughout our journey. We have been royally entertained at all places where our party was scheduled to stop. We have been treated and toasted and have met with nothing but good fellowship and a glad hand."

Before their departure from Winnipeg, members of the party were interviewed and asked for a brief outline of their impressions of the west. The following summaries, will give western Canadians an impression of the feeling which their own country creates in the mind of the interested visitor:

Mr. T. Kilmer, western Nebraska, states: "I am convinced there is no place in north America that offers such wonderful opportunities to the young man to own his own farm home as do the fertile fields of western Canada." Richard Eliason, of Wood, western Canada's wheat crop is the best I ever saw or dreamed of; furthermore, opportunities for mixed farming on low-priced but fertile lands with small capital are the best I know of in any country." H. J. Hanson, of Leeds, N.D., reports: "For a man with limited means to make a home for himself and his family, it is the best place in north America at the present time."

Had Ride On Turf

A visitor off Leighton-on-Sea recently was given a few rides by a big turtle. It suddenly showed the horse up out of the water and carried him several feet.

WORLD HAPPENINGS
BRIEFLY TOLD

Three American military regiments have accepted invitations to visit Great Britain and France next May.

The former German Crown Prince recently journeyed from Berlin to Breslau in an aeroplane.

One thousand horses are estimated to be ill with or convalescing from influenza in Montreal.

The most powerful lighthouse in the world has been erected at Dijon, France, to enable aeroplanes to check their direction and location.

Richings done by Queen Victoria are being exhibited in London for the first time, the Queen having been a pupil of Lancaster.

The French and Belgian forces of occupation are rapidly evacuating the rich territory of the Ruhr region in Westphalia.

William Galbraith, a pioneer of northern Saskatchewan and for many years manager of the Hudson's Bay store at Prince Albert, died recently after a long illness.

An Okanagan apple crop of 1,883,500 boxes, compared with last year's yield of 2,160,500 boxes, is the latest estimate by the horticultural department of British Columbia.

The epidemic of influenza in Port Yukon, Alaska, has reached serious proportions, according to the Pacific branch office of the American Red Cross.

A rumor persists in Ottawa that Rt. Hon. Ramsey MacDonald, leader of the British Labor party, is to visit Canada this year. His visit, as planned, it is understood, would be of a private nature.

Due to the great decrease in the number of partridge, the Ontario department of game and fisheries has declared a closed season for partridge, prairie fowl, wild turkeys, quail or pheasants in the Port Arthur-Port William district.

The lavish furnishings of the Czar's famous personal dining room will go to the United States, according to a Morning Post dispatch from Leningrad, which says an unnamed American bid \$500,000 for the outfit and got it.

The Bonne Entente

Two Races That Can Each Contribute to the Greatness of Canada

Little by little the number of people who see things as they really are grows greater, who recognize the advantage to Canada in having two great races destined to live alongside one another, and to bring to the profit of their country the precious qualities which are the peculiar heritage of each. The "Bonne Entente" is not being established as rapidly as one could wish, but it is making progress. Years are required, perhaps centuries, to cement such union; but that they are cemented in time is an undoubted fact—L'Action Catholique (Quebec).

Received Canadian Flowers

Queen Mary Presented With Basket of Peonies From Montreal

Beautiful bouquets of Canadian peonies have been presented to Queen Mary, Princess Mary and Dame Margaret Lloyd George. The peonies are part of a shipment of three thousand peony blossoms sent to Wembley exhibition from Montreal by the grower, Mr. W. Grandston Roy, of Montreal, whose aim it is to make Canada famous as the home of the peony.

A special basket of the same flowers was escorted to Buckingham Palace by Mr. J. Rye, for presentation to the Queen.

The King of Optimists

The crown for ability to be an optimist in the face of disaster should go to a colored individual named Sam, who recently was thrown into jail.

His friend Moss had already preceded him to prison for stealing chickens. "How long you in jail for, Sam?" inquired Moss.

"Two weeks," answered Sam.

"What are you charged?"

"No charge, observing an free."

"Ah mean, what has you did?"

"Done shot my wife."

"You still killed 'er wife and only in jail for two weeks?"

"Dat all—den I gets hung."

W. N. U. 1587

New Zealand Exhibition

Canada Hopes to Derive Considerable Benefit From Taking Part

Canada's participation in the New Zealand and South Seas exhibition which is to be held at Dunedin, New Zealand, on November 1, 1925, to April 30, 1926, will show to advantage the productions of this country's resources and industries. The Canadian Government exhibition commission has contracted to take 24,500 square feet of space in the best location on the exhibition ground, and will erect a very representative exhibit showing the natural resources and products of the Dominion and the attractiveness of this country as a place for tourists.

Plans for the design and lay-out of the Canadian exhibit have been prepared and will be carried out by J. O. Turcotte, architect of the Canadian Government exhibition commission, who will leave Ottawa for New Zealand about the end of the month. He is now returning from the British Empire exhibition, where he supervised the erection of the Canadian Pavilion and the elaborate scheme of displays connected with the different exhibits in the pavilion.

Canada stands to derive considerable benefit from taking part in this exhibition. When the International exhibition was held at Christchurch, New Zealand, in 1907, Canada took a prominent part and as a result trade with New Zealand was rapidly developed and a tariff was negotiated with the New Zealand Government which granted preferential rates on certain Canadian goods.

The tariff was negotiated in 1908 and has been in force ever since; last year the exports of Canadian goods to New Zealand totalled \$12,735,630, imports from New Zealand were \$5,181,025.

Accommodation will be available in the Canadian exhibit for between 80 and 90 Canadian manufacturers. As the space is strictly limited, interested persons or firms are advised to make their application at once to the Canadian Government Exhibition Commission at Ottawa.

Income From Candle Ends

Perquisite Stops Now That Buckingham Palace Is Equipped With Electricity

Burnt candle ends have provided a noble woman in London, and her family, a comfortable income. Over a century ago her grandfather acted as assistant to the lord steward of Buckingham Palace, and as the particular perquisite of his position he was granted all the candle ends from the state apartments. As candles were the only form of illumination used in those days, thousands of them were needed for every royal function. The half burnt candles and candle ends were resold to a fashionable tailor chandler where all the dwellers in big houses bought their candles. Sometimes when the function had been a short one, the profit to the lord steward's assistant was very great, for it was a right rule that no candle in the royal apartments should be relighted after being put out. Though electric light has been used in Buckingham Palace for many years, the candlesticks were religiously filled afresh for every ceremony. But now, in the recent redecoration of Buckingham Palace, the candlesticks in the state apartments have been removed. And with them will disappear the royally granted perquisite of the candle ends.

Visioning the Future

Adverse Conditions Magnified and Favorable Facts Ignored

There has been too much loose talk about bad conditions in Canada. The "inferiority complex" has been the favorite malady of too many men for several decades. Sometimes it is the result of party feeling, and sometimes the fruit of the old condition that "far away fields look green." In recent months the adverse conditions have been magnified and the favorable facts ignored by too many people. Something of the same condition exists in Great Britain, leading to the protest of an outsider like Ernest Marshall, as published in a recent London cable to The Globe. John Bull's troubles are real enough, but they are exaggerated by the constant complaint of some observers.—The Toronto Globe.

Lake Titicaca, on the top of the Andes Mountains, is 15,500 feet above sea level and is the highest navigable body of water in the world.

ECLIPSE FASHIONS
Exclusive Patterns
by Gaudin

The Vogue For Flare

Skirts complete circles and waists are nipped in, and both are considered smart. In wardrobes designed for wearing at the country club, and for innumerable outings afterward. This attractive combination a labot held in place by a flat band buttoning to the neck and topped by a youthful collar. The sleeves are long and gathered to a turn-back cuff that is fastened with links. A deep band buttons on the hips and holds the fullness firmly in place. Sizes 34, 36, 38, 40, 42 and 44 inches bust. Size 38 inches bust requires 2 1/2 yards of 36-inch of 40-inch material. Soft front and back flares make an appeal of smartness in this two-piece skirt, with side-front closing, fitting smoothly on to an inner band. Sizes 26, 28, 30, 32 and 34 inches waist. Size 28 waist requires 3 1/4 yards of 36-inch, or 2 1/2 yards of 34-inch material. Each pattern 30 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress maker. Each copy includes one coupon good for five cents in the purchase of any pattern.

Immigration From Britain

Increased Movement of British Families for Dominion in 1926

W. R. Little, Canadian immigration commissioner in Great Britain, who has arrived in Ottawa, predicts a much increased movement of British families to Canada next year. The process that has been worked out this year, he says, will make next year's problem much simpler. Meanwhile, as the result of recent conferences, the duplication of effort by the government and the two railway systems is, in large measure, being removed with beneficial results.

Tribute To Canadians

France to Honor Memory of Two Former Residents of Quebec

Dr. Victor Morin, president of the Montreal Historical Society, has left for France to represent Canada in honoring the memory of two former Canadians. He will officiate at the unveiling of a monument at Brest to Louis Hémon, author of "Marie Chantal" and other novels on French-Canadian life. At Neuville-sur-Vaune, in the Champagne district, Dr. Morin will arrange for the stationing of a memorial tablet in the village church to commemorate the birth of Paul Chomedey, Sieur de Maisonneuve, founder of Montreal.

Coffee is believed to have been grown first in Abyssinia. It was not native of Brazil, which now furnishes two-thirds of the world's coffee supply.

Future of the Far North

Arcic Will Some Day Be Under Profitable Cultivation

Mr. Michael N. Mason, F.R.S., F.O.S., F.Z.S., has travelled extensively in the far northern region of Canada, and in his new book, "The Arctic Forests," he discusses the future of the white man in the Arctic region.

He denies "the fallacy" of supposing that the farther one goes north the less favorable do the conditions of life become, asserting that "the difficulties are not caused so much by the latitude as by the remoteness from civilization and the consequent labor of transport."

Point is made of the fact that many of the north Canadian territories once treated as "back of beyond" are now occupied and under profitable cultivation.

Mr. Mason says: "The world of today is scrambling for the muck like rats in a sewage bed, while the newest country in all the globe holds out her arms to take in manhood, offering success for exploitation. Is manhood deaf or dead? Surely not, but how easy they to be of these wonderers in store for them? How gladly they would go if they only knew!"

Noble Game of Golf

Toronto Claims to Be Premier Golfing City in Canada

Toronto lays claim to being the premier golfing city in Canada. Enormous jumps in popularity for the ancient and royal game are recorded every year. It has reached a stage where it is one of the city's most thriving industries—no longer is it a game. Today there are 22 large clubs in the city. In 1913 there were approximately 3,000 golfers, but today there are nearly 14,000 active participants. It is said on authority that Toronto's annual golf bill now passes three million dollars.

While Toronto is the leader, the West of Ontario is quite in the golf line, there being 14 clubs in the province. The nearest rival to this city is Winnipeg with 14 clubs and Montreal with 13. Winnipeg boasts more golfers per capita than any other city in the Dominion, although Calgary runs a close second.

Unique Advertising Idea

Reason Why Jokes Are Made About Aberdeen Stinginess

Aberdonians are spenders and not tight-wads as so often reported. One of the stock in trade jokes at Aberdeen's expense has pictured it as a city with only one Jew inhabitant, and the Jew remained there because he couldn't get enough money together to buy a house in the mainland. A London investigator found that the barbers would take no tips, that a picture postcard of Aberdeen, valued at four cents, was given away, and that many shops in Aberdeen had signs in the windows, "A joke a day keeps the doctor away." It is now asserted that there is a band of joke-smiths at work in Aberdeen—for purposes of advertising—thinking up snappy stories about the stinginess of Aberdonians, which are disseminated at regular intervals.

Ancient Gates Returned

Taken From Chinese Village By British in 1899

Kamlin's ancient gates which had been removed by the British in 1899 were recently formally placed back in their original positions. The ceremony was performed by the governor, the president of the government officials and leading Chinese and European residents at the village of Kamlin, in the New Territories. The whole proceedings, and the speeches of this governor and of the Chinese, were marked by a wonderful cordiality and enthusiasm, and paid eloquent testimony to Anglo-Chinese friendship and the goodwill of the villagers.

Alligator Scores Kansas Bathes

Swimmers in the Elk River went sailing for the shore when a big alligator suddenly popped his head out of the water. When a circus disbanded in a neighboring town two years ago, two alligators were thrown into the river.

More Widows On Coast

California now claims more widows according to her population than any other state. About 13 per cent. of the women over 15 are widows, according to the census bureau. North Dakota has the lowest percentage.

SUNDAY SCHOOL LESSON

AUGUST 2

THE EPISTLE OF JAMES.

Golden Text: Be ye doers of the word, and not hearers only. James 1:22.

Lesson: The Book of James. Devotional Reading: James 1:12-13.

The Text Explained and Illumined

Put away anger, verses 19, 20.—The author of this Epistle believes that members of the Christian Church should be "living epistles," exemplars of the Christian virtues. "Let every man be swift to hear, slow to speak, slow to wrath," he counsels.

"Three things are here required; keenness in listening, deliberation in speaking, control of feeling. We are to be very alert in the first, but the second and third are to be held firmly in leash. It is the way of the Master, and it will be found the way of life. O Lord my God, give me the listening ear. Let me miss nothing of all thy counsels. Give me a wise control of speech; let not my words be the servant of mischief" (Dr. J. H. Jowett).

For human anger does not promote righteousness, continues James. James is said to have been known as James the Righteous, an appropriate designation; for his whole Epistle is a treatise upon righteousness.

"Man's wrath is rarely, if ever, justifiable; even 'just indignation' is too often intermixed with other elements, and frequently the wrong on which it is founded are at fault. Man, unlike God, never knows all the circumstances of the case" (W. E. Oesterly).

"The worst thing we can bring to a religious controversy is anger. This however it may pretend to be raised by a concern for what is just and right, and to be trusted. Wrath is a human thing, and the wrath of man stands opposed to the righteousness of God. Those who pretend to serve the cause of God hereby show that they are acquainted neither with God nor his cause" (Matthew Henry).

Disarmament Question

Director of Military Operations For Great Britain During War Voices Opinion

"The tendency among nations to limit armaments is growing very slowly," said General Sir Frederick Maurice, director of military operations for Great Britain in the war, here in an interview with "The New York Times."

"Before nations limit their military establishments," he said, "they will have to feel secure and free from sudden attack. There is growing, however, a sense of disarmament, but I do not expect that the time will come when nations will completely disarm."

Valuable Shipment From Russia

Platinum Worth \$250,000 Sent By Soviets to London Bank

Filled with platinum, two great chests, weighing together three tons, stood on a wharf near London Bridge recently under close guard awaiting removal to one of the London banks. They had been landed from a Russian steamer, the Lieutenant Schmidt. The chests contained platinum and were reported to be worth \$250,000, and that they had been sent to a London bank by the Russian Soviet Government. The chests were really great safes cased over with wood.

Training For Ocean Trip

Canadian Canoeist Proposes to Cross Atlantic in Small Craft

Lieut. Smith, the Canadian canoeist, who proposes to cross the Atlantic in an 18-foot canoe, has begun a 2,000-mile training trip along the River Roder to England. Smith recently was in Italy, where his daring ventures in his frail craft aroused great interest. Before visiting Italy he passed through Paris and showed the Parisians how he could jump off a bridge with his canoe without injury and then paddled up the Seine. Five thousand persons lined the river bank at Pless, Prussan, when Smith started for Bergen, to cheer him along.

POWERS HOPE TO SOLVE PROBLEM OF CHINA SOON

Washington.—Substantial accord has been reached by the powers of a formula to deal with the whole Chinese problem.

Formal acquiescence in some elements of the programme still is lacking, but the Peking diplomats are expected to be in a position to submit the formula to the provisional government of China at an early date.

The settlement to be proposed will include the Washington conference plan for revision of Chinese customs duties and creation of a commission of inquiry into extra-territorial questions; and also the British proposal for a new judicial inquiry into the responsibility for loss of lives in the recent Shanghai fighting.

The plan for dealing with the Shanghai incident is expected to be contingent upon participation by the Peking Government in the inquiry and agreement by that government to be bound by the findings of the investigation.

Argentine Plans For Reception Of Prince

Twelve Thousand Men Will Take Part In Military Parade

Buenos Aires.—Argentine is making preparations for receiving the Prince of Wales, notwithstanding that, according to present arrangements, he will not reach here for his south American visit until mid-August. He will come to Buenos Aires aboard the British cruiser Curlew, transferring to that warship at Montevideo, Uruguay, from the battleship Republic, aboard which he will come from South Africa. This change is necessary as the Republic is unable to enter the port of Buenos Aires because of its heavy draft.

The Curlew has sailed from Pernambuco, Brazil, for Montevideo, to await the arrival of the Prince, due there on August 14.

The official programme in honor of the heir to the British throne will comprise a military parade in which 12,000 men of the Argentine army and navy will have a part, and a display of 40 military aeroplanes.

In order to familiarize himself with the city of Buenos Aires, the Prince's private chauffeur has already arrived.

Bank Merger Accomplished

No Distanting Vote Received From Union Bank Shareholders

Winnipeg.—The transfer of the business and assets of the Union Bank of Canada to the Royal Bank of Canada became an accomplished fact when the formal consent of the shareholders of the Union Bank was given to the transfer at a special meeting held at the head office here.

The vote revealed a complete concurrence in the step taken by the directors. More than 67,000 votes were cast, personally or by proxy, out of a total of 60,000 eligible, and none was in favor of the resolution, without one dissenting vote.

Fatal Automobile Accident

St. Cloud, Minn.—Mr. and Mrs. Walter Rodgers, of Osborn, Sask., were both killed in a crossing accident here when their light sedan was struck by the Comet, the Northern Pacific east-bound Yellowstone Park special, on West St. Germain Street.

Mrs. Rodgers was instantly killed and her husband died, as in his ambulance reached the hospital.

Mr. and Mrs. Rodgers were on their way to Noyes, Minn.

Wage War On Grasshoppers

Victoria, B.C.—Yard swarms of grasshoppers are devastating hundreds of square miles in central British Columbia, the department of agriculture is advised. By an order-in-council, the government has voted \$15,000 for poison, which will be distributed to the farmers for use in the affected areas.

Unemployment In Britain

London.—The number of unemployed persons on the roll last week was just under 1,250,000. This was 222,400 more than the number of unemployed at this time last year.

W. N. U. 1547

Alberta Oil Strike

Foremost Field Is Coming Into Prominence Through Recent Developments

Calgary.—Oil in considerable quantity was struck in the number five gas well in the Foremost field of the Canadian Western Natural Gas and Power Company, early last June, it has just become known here, says a special dispatch to the Herald. The oil strike was kept a dead secret and in the interim officials and employees of the gas company have mined on thousands of acres surrounding the Foremost structure.

The oil was struck at a depth of 2,502 feet. It rose about one hundred feet in the hole, covering the sixty-foot string of tools and about forty feet additional of the cable.

Acting under company orders the drillers were sworn to secrecy, drilled on through the producing sand, cased it off, baled out the oil and then drilled on down to the gas sand at 2,650 feet.

Held Day At Ellis Island

Englishman With Proper Passport Reverts Humiliating Treatment

New York.—In protest against the treatment he received at Ellis Island, where he and his wife were held an entire day, although they came here as tourists, Ralph Adams, an English business man, said he will leave the United States.

Adams said he had bought student class tickets on the Levantian with the definite understanding he would not be held at Ellis Island. He and eight other non-American tourists travelling in student class, all with passports, were taken off the Levantian, he said, sent to Ellis Island and subjected to medical examinations which he termed "humiliating in the most extreme sense."

Mr. Adams said he intended to take the matter up with the British consul, and also with the United States line.

Wisconsin Man Has Disappeared In London

Professor Was Delegate to Educational Convention in Edinburgh

London.—A 24-hour search by Scotland Yard failed to reveal even a trace of Professor J. Victor Collins, of Stevens Point, Wis., delegate to the World Federation of Education Associations, who disappeared here.

Professor Collins had intended to take a late train for Edinburgh, where the educational convention is in session. He went to the station to obtain heavy luggage and that was the last his daughter saw of him.

Boost Wheat Prices

United States Experts Get Higher Price For Wheat Than Canada

Washington.—Secretary of Agriculture Lindbergh predicted that the United States wheat price this year will be "satisfactory," and well above the Canadian price.

"The tariff will work when we are not exporters," the secretary said.

He said he did not expect a surplus supply of wheat this year, owing to a short crop in the winter wheat belt.

Plane Carries Treaty Money

Ottawa.—Over 4,000 Indians of James Bay district received their treaty money with unprecedented promptness this year. The trip to distribute the treaty money usually takes over two months. This year, the work was accomplished in three weeks by means of a seaplane of the Ontario Provincial Air Service.

Dr. Branton, Man.—The first fall rye has been harvested in this district, and cutting will be general in a week's time. The crop is likely to be a fairly good one, and is ripening rapidly.

MIGHTY LOGS FROM BRITISH COLUMBIA

A record-breaking consignment of Douglas Fir logs which arrived recently at Dorval, Quebec, over the Canadian Pacific lines direct from New Westminster, B.C. The load consists of twenty-nine logs, some of which were so long that three flat cars were required to carry them. Of the twenty-nine, 12 were 59 feet long, one was ninety feet, 12 were 52 feet, and 4 were 40 feet long, while the load weighed 86,653 pounds. The lumber is intended for an eastern firm of contractors.

COAL STRIKES THREATENED IN BRITAIN AND U.S.

London.—A possibility of a great coal strike was increased when miners refused to confer with owners unless the latter first withdrew their proposals for wage decreases.

The attitude of the workers was expressed when the Miners' Federation announced this morning its refusal of the conference proposed by the owners. Previously hopes had been entertained that the two interests might get together around a conference table and avert the threatened strike.

Evans Williams, chairman of the Coal Owners' Association, wrote A. J. Cook, secretary of the Miners' Federation, suggesting a conference. The recent action refuses that suggestion. The existing working agreement between miners and owners in Great Britain expires July 31. The owners have announced the conditions upon which they renew the agreement.

The miners say their conditions involve lower wages or longer hours and the Miners' Federation has advised its men to refuse to work under the proposed terms.

Atlantic City, N.J.—A nation-wide coal strike unless the government intervenes to prevent cessation of wage contracts in northern West Virginia is threatened by Van A. Bittner, chief representative of the United Mine Workers in that district.

Annual Dinner Called Off

Rhodes Trustees Will Not Entertain Scholars This Year

Oxford, Eng.—The annual dinner given by the Rhodes trustees to the Rhodes scholars will be omitted this year because of the death recently of Lord Milner. It is thought the custom of the annual dinner will not be revived until the new building, which is to be the Oxford headquarters of the Rhodes Trust, is completed.

Past dinners have been notable for the eminence of the speakers. English statesmen, including the prime minister, making them occasions for pronouncements of their views on Anglo-American and Empire questions.

Report Traces Of Rust

University of Saskatchewan Professor Does Not Expect Much Damage

Saskatoon.—Traces of rust starting on wheat have been observed in this district, according to the statement of Prof. Manley Chagnin, head of the department of field husbandry at the University of Saskatchewan. What rust that has been seen was on the leaves. None has been seen on the stems of the wheat as yet, he said. With favorable weather, it is not likely to develop enough to hurt any of the early crops, the professor stated.

Ship Paper to New Zealand

Port Arthur, Ont.—The Port Arthur branch of the Provincial Paper Mills, Limited, shipped a cartload of book paper to Christchurch, New Zealand. Further shipments will be made from time to time to the same destination. Orders for four cartloads of this high quality product are now on hand.

Harvesting Fall Rye

Drandon, Man.—The first fall rye has been harvested in this district, and cutting will be general in a week's time. The crop is likely to be a fairly good one, and is ripening rapidly.

Many Guests Attend Royal Garden Party

Grounds At Buckingham Palace Thronged With Visitors

London.—One of the most successful and colorful royal garden parties given since the war was held in the beautiful grounds of Buckingham Palace, July 21, with King George and Queen Mary as hosts to seven thousand of their subjects and distinguished guests from foreign countries.

Their Majesties greeted as many guests as possible as they moved about in separate directions through the crowds of well-groomed men and fashionably coiffed women.

King George wore a grey morning suit and a grey top hat. He had a white gardenia in his buttonhole. Queen Mary was charmingly dressed in pale heliotrope trimmed with pearls and carried a heliotrope parasol.

Change In Pensions Measure Resisted

Proposed Amendment to Bill Discussed in British House

London.—In spite of appeals from several quarters of the House of Commons, the government successfully resisted a proposed amendment to the Widows and Orphans and Old Age Pensions Bill, to the effect that pensions should be paid to those entitled to pensions who are going to reside in other parts of the empire.

On behalf of the government, it was stated that administrative difficulties rendered the proposal impracticable, although steps were being taken to make a reciprocal arrangement with any dominion that instituted a similar scheme whereby a man's pension rights could be transferred into a dominion scheme working in conjunction with the British scheme.

No Cattle Shipments By St. Lawrence Route

Not Sufficient Money in Business Say Shipping Companies

Montreal.—Local shipping companies have announced they will not place any more cattle ships on the St. Lawrence route to England, in spite of the shortage of space that is causing many complaints from exporters, "because it does not pay them." They state there is little likelihood of an increase in rates and that is why they cannot meet sufficient out of the business of conveying Canadian cattle to the British market.

Alberta Willing to Take Part

Will Participate in Conference on Question of Succession Duties

Edmonton.—The Alberta Government will take part in a conference which it is proposed to hold in the near future on the question of succession duties. Attorney-General Brownlee has replied to a suggestion made by Premier Bracken of Manitoba, who is strongly desirous of having such a conference, to the effect that Alberta will be ready and willing to participate at such time and place as may be arranged.

Elected By Acclamation

Regina.—Dean Alexander Hall, of Prince Albert and Lac la Poudre, was accorded an acclamation by the electors of the Cumberland constituency at Prince Albert when his was the only name placed in nomination. The return of Mr. Hall assures the government of 51 supporters against a combined opposition of 31, with H. A. Crose still to vote.

SECURITY NOTE OF GERMANY IS NOW CONSIDERED

Paris.—The French Government has begun careful consideration of the German security note presented to the allies, and will get in touch as soon as possible with the various countries interested to determine the policy to be followed in carrying out, if this is decided, the negotiations with the German Government for a security pact guaranteeing the western frontiers of Germany. This exchange of views will require many days and consequently the conversation with Germany through her ambassadors, either at Paris or London, which can begin only after the close of inter-allied examination of the note, will not start for some time to come.

Conquering Of Mount Logan

Messages of Congratulations Received For Magnificent Feat Of

Vancover.—Messages of congratulation on the magnificent feat of the Canadian Alpine Club's expedition in conquering Mount Logan have been pouring in to A. C. Wheeler, at Banff, director of the Alpine Club of Canada. The achievement of Captain McCarthy, Lieut.-Col. W. W. Foster, and their companions is regarded in mountaineering circles of the world as one which called for dauntless courage and the most skilful organization.

Among the messages received by Mr. Wheeler was one from Ottawa, relating a message from Right Hon. L. C. S. Amery, secretary of state for dominion affairs, himself an enthusiastic mountaineer, who attended the Canadian Alpine Club's camp at Lake O'Hara in 1909.

Evolution On Trial

Another Court Action In U. S. Has Commenced

Washington.—An action which may throw the whole evolution question into the federal courts for judicial determination as to whether the teaching of this scientific theory incites disrespect for the Holy Bible was begun here by Loren H. Wittener, a government employee.

The vehicle employed is a rider to the 1925 District of Columbia Appropriation Bill, which provides that "no part of this sum (for the public schools) shall be available for the salary of any superintendent who permits the teaching of, or any teacher who teaches, disrespect for the Holy Bible."

May Fill Vacancies In Senate

Two Out Of Nine Seats Are For Alberta

Toronto.—A dispatch to The Toronto Mail and Empire under an Ottawa date-line declares that before the prospective Dominion general election, the government will fill the present vacancies in the senate. There are nine seats now vacant, two in the Prince Edward Island quota, one in New Brunswick, two in Quebec, two in Ontario and two in Alberta. The Mail and Empire dispatch mentions Hon. Philippe Roy, now commissioner-general in Paris, W. C. Buchanan and Hon. Frank Oliver, as possible appointees to the Alberta vacancies.

British Naval Programme

London.—It is reported that the cabinet crisis over the cruiser question ended in a victory for the admiralty at Wednesday's cabinet meeting. Newspapers assert that the cabinet decided to comply with the admiralty's modest demand for the building of four vessels this year and three next year.

Rounding Up Wild Horses

Calgary.—Hundreds of horses, sometimes of which have never had a bit in their mouth or a saddle on their backs, are being rounded up by the whole Sarcee Nation, to provide for the big Indian stampede that the braves are going to stage at the Sarcee Reservation, August 6.

A lands ball filled with nitrogen and iron to be so constructed that it will never lose any of the gas has been put on the market by a British firm.

His Competitors Marvelled

¶ And it came to pass after the wide-awake merchant had advertised his goods there came unto him great multitudes from all the regions round about.

¶ And lo! when his competitors saw this they marvelled greatly among themselves saying:

How is it that this bird is busy while we sit at ease or loaf about our doors?

¶ And the wise guy took a moment off and spoke unto them saying:

Verily I say unto you, in this fast age of push and rustle it is easier for a camel to pass thru the needle's eye than for a business man to flourish without advertising!

¶ Thus it is written that all may profit thereby.

Here and There

This year's receipts from motor vehicles licenses in New Brunswick already amount to \$422,000. This amount is larger than the total for any year, except last year when the gross receipts for the whole twelve months were \$458,489. The estimate for the present year is half a million.

The mines and quarries of the Province of Quebec produced to the value of \$18,962,896 during 1924, according to the final report issued by the Provincial Department of Mines. Building materials account for \$11,880,977; other non-metallic minerals \$7,191; and metallic minerals \$380,804.

"In the Cascades and falls of the Canadian Rockies there is enough hydro-electric power to supply the American west with all the electric energy it will need for ages to come," declared W. Paxton Little, treasurer of the Niagara Falls Power Company, who recently visited Banff with a party of distinguished American electrical magnates.

That the Province of Quebec abounds in historic and romantic material for the construction of popular novels, is the judgment of two popular writers—James Oliver Curwood, author of scores of best sellers, and Edwin Palmer, well-known about story writers—who have recently toured the province and Western Canada in quest of "local color."

There has been an unusual distinction conferred upon Prof. Camille Couture, a Montreal musician, who, besides being a violinist, is also a maker of violins. He has been honored with a medal and diploma from the British Empire Exhibition at Wembley for a magnificent violin of his make, which he exhibited there.

In order to dispel the existing impression in England regarding the coldness of the Canadian climate, five thousand peony blooms are being distributed at the Canadian Pacific Railway Pavilion at the British Empire Exhibition. These plants were produced by W. Orniston Roy, of Montreal, who states that peonies are the best landscape flower and can be grown in all parts of Canada, irrespective of climatic conditions.

Hon. W. G. Nichol, Lieut.-Governor of British Columbia, and D. C. Coleman, Vice-President of the Canadian Pacific Railway, opened Crystal Gardens, the new and unique indoor salt-water swimming pool at Victoria, B.C., recently. This amusement centre, which has two dancing floors, a gymnasium, art gallery and tea-rooms, is regarded as the largest and finest of its kind on the continent.

Being exceeded only by Mexico and the United States, Canada now ranks third among the silver producing countries of the world. Records of Canadian production have been kept since 1858 and show a total recovery of 451,000,000 fine ounces to the end of 1923. In 1924 production was slightly in excess of 20,000,000 ounces. During 1858-1923 the value of production totalled \$280,705,632, while for last year it amounted to \$15,619,843.

The first lot of buffalo, numbering some 200, to be transferred from the Wainwright Park to the new Buffalo Park, north of Edmonton, left Wainwright, Alberta, recently. For some time past the herd at Wainwright had been growing too rapidly and the Federal authorities decided to ship a number to the Buffalo Park to determine whether or not they can acclimate themselves in the new district as they did in the southern area. Altogether two thousand buffalo, in lots of two hundred each, will be shipped to the Buffalo Park.

New "Baby City" of Ontario

(1) North Bay's Main Street. (2) The Canadian Pacific Station, North Bay. (3) The Post Office.

An Old Home Week Celebration to celebrate the attainment of City status will be the big attraction for Northern Ontario the first week in August. North Bay, to-day the largest Town in the Province, with a population officially estimated at 15,011, will become the Baby City of Ontario on Sunday, August 2nd. For the following six days, it will be the case of "open house" with all the well-known hospitality of the North Country.

Special services in all the City churches, conducted in most cases by former pastors, who were identified with the early history of the Town, will inaugurate Old Home Week. The following day officials take charge with "Tric Day," when the formal presentation of the City Charter will be made at Memorial Park and representatives of the Federal and Provincial Governments will extend their congratulations to the Gateway City of the North.

A race track has had to be prac-

tically rebuilt, two privately owned parks have had to be taken over for the year and other large expenditures incurred, but the citizens are behind the celebration movement and are determined to make it something that will be long remembered in the Northland.

The history of North Bay is one that is not generally known to all Canadians, even though the name is familiar from the Atlantic to the Pacific, as a great railroad centre. North Bay was originally discovered by Samuel de Champlain in 1615 and was a post on the old trail from the Ottawa to the Great Lakes in the time of the great French explorer.

The first settlements here are recorded as in 1852, with the coming of the first train over the Canadian Pacific Railway. North Bay was never incorporated as a village. Like Torbay, it just grew and became officially a town in 1911. In 1925 the population was 2,294, in 1926 it was 2,513, and in 1928 it was 10,641, and

the last municipal census placed it at 15,611, while the rapid growth of the town this year indicated that it will be at least 15,000 when it takes its position as a City next August.

The Canadian Pacific paved the way for North Bay. The old Grand Trunk followed with its first train in June, 1853. Next was Northern Ontario's own railway, the Temiskaming and Northern Ontario, which—as built north to the mining area from North Bay in 1904, the first train being operated out of here on January 27th, 1905. The Canadian Northern was the fourth line to come in here, their first train arriving on September 14th, 1915.

Three and a half tons of gold bullion pass through North Bay every month from the Northern Mines; together with 15 tons of silver bullion, 633 tons of high-grade silver ore, 6,000 tons of pulp and 15,450 tons of paper. It makes a formidable array when checked up.

BARRE, SON OF KAZAN

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BARRE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog, is an Adaptation of This Story

CHAPTER I.

To Barre, for many days after he was born, the world was a vast gloomy cavern.

During these first days of his life his home was in the heart of a great windfall where Gray Wolf, his blind mother, had found a safe nest for his babyhood, and to which Kazan, her mate, came only now and then, his eyes gleaming like strange balls of greenish fire in the darkness.

Barre, of course, would never know their story. He would never know that Gray Wolf, his mother, was a full-blooded wolf, and that Kazan, his father, was a dog. In him nature was already beginning its wonderful work,

ing sound. A note of loneliness, of gladness, of a great yearning. "It is all right now," he was saying to Kazan; and Kazan—pausing for a moment to make sure—replied with an answering note deep in his throat.

Still slowly, as if not quite sure of what he would find, Kazan came to them, and Barre snuggled closer to his mother. He heard Kazan as he dropped down heavily on his belly close to Gray Wolf. He was unafraid—and mightily curious. And Kazan, too, was curious. He sniffed. In the gloom his ears were alert. After a little Barre began to move. An inch at a time he dragged himself away from Gray Wolf's side. Every mus-

now this blackness seemed breaking itself up into strange shapes and shadows. Once he caught the flash of a fiery streak above him—a gleam of sunshine—and it startled him so that he fastened himself down upon the log and did not move for half a minute. Then he went on. An ermine squeaked under him. He heard the swift rustling of a squirrel's feet, and a curious whirr-what-what that was not at all like any sound his mother had ever made. He was off the trail.

A new terror held Barre rooted there. In an instant the whole world had changed. It was a flood of sunlight. Everywhere he looked he could see strange things. But it was the sun that frightened him most. It was his first impression of fire, and it made his eyes smart. He would have slunk back into the friendly gloom of the windfall, but at this moment Gray Wolf came around the end of a great log, followed by Kazan. She snuggled Barre joyously, and Kazan in a most doglike fashion wagged his tail. This mark of the dog was to be a part of Barre. Half wolf, he would always be his tail. He tried to wag it now. Perhaps Kazan saw the effort, for he emitted a muffled yelp of approbation as he sat back on his haunches.

For Barre it had been a great day. He had discovered his father—and the world.

CHAPTER II.

And it was a wonderful world—a world of vast silence, empty of everything but the creatures of the wild. The nearest Hudson's Bay post was a hundred miles away, and the first town of civilization was a straight three hundred to the south. Two years before, Tusoo, the Cree trapper, had called this his domain. It had come down to him, as was the law of the forest, through generations of forefathers; but Tusoo had been the last of his worn-out family; he had died of smallpox, and his wife and his children had died with him. Since then no human foot had taken up his trail.

The lynx had multiplied. The moose and caribou had gone untroubled by man. The beaver had built their homes undisturbed. The tracks of the black bear were as thick as the tracks of the deer farther south. And where, once, the meddlesome and pollen-bred of Tusoo had kept the wolves thinned down, there was no longer a menace for these mohawks of the wilderness.

Following the sun of this first wonderful day came the moon and the stars. The lynx had multiplied. Half a dozen times, as Barre wandered about near the windfall, he heard a soft whirr over his head, and once or twice he saw gray shadows floating swiftly through the air. They were the big northern owls swooping down to investigate him, and if he had been a rabbit instead of a wolf-dog whelp, his first night under the moon and stars would have been his last;

The sun was straight above the forest when, an hour or two after Kazan's visit, Gray Wolf slipped away. Between Barre's nest and the top of the windfall were forty feet of jammed and broken timber through which not a ray of light could break. This blackness did not frighten him, for he had yet to learn the meaning of light. Day and night; was to fill him with his first great terror. So quite fearlessly, with a yelp for his mother to wait for him, he began to follow. If Gray Wolf heard him, she paid no attention to his call, and the scrape of her claws on the dead timber died swiftly away.

This time Barre did not stop at the eight-inch inch which had always shut him in the world in that particular direction. He clambered to the top of it and rolled over on the other side. Beyond this was vast adventure, and he plunged into it courageously.

It took him a long time to make the first twenty yards. Then he came to a log worn smooth by the feet of Gray Wolf and Kazan, and stopping every few feet to send out a whimpering call for his mother, he made his way farther and farther along it. As he went, there grew slowly a curious change in this world of his. He had known nothing but blackness. And

for unlike Wapoose, the rabbit, he was not cautious. Gray Wolf did not watch him closely. Instinct told her that in these forests there was no great danger for Barre except at the hands of man. In his veins ran the blood of the wolf. He was a hunter of all other wild creatures, but no other creature, either winged or fanged, hunted him.

(To be continued)

A Tourist Camp At Night

Some of the Trials of the Motorist On Tour

The klaxon sounds the knell of parting day, some late arrivals through the dust clouds creep, and three hours after we have hit the hay the noise calms down so we can get to sleep. Save where, from yonder penann-clad sedan, the radio set emits its raucous squeal, and underneath a nearby light a man pounds until daylight on a busted wheel. Beneath those tattered logs, those patent tents where falls the dust into each sunburned pore, each on his folding bed of light expense, the rude explorers of the highway snore. Let not ambition mock their creaky cars, their khaki clothes of vintage obscure, no grandeur view, with bangles like a car's, the short and simple flippers of the poor. The boast of shiny paint, the pomp of power, and all that charms the motoristic poe, await alike the inevitable hour—the paths of touring lead but to the shop. Can streamlines hood or silver-plated hubs, back to its mansion call the missing spark, can plush upholstery foil the clumsy dubs, who bang into your fenders in the dark? Full many a book of purest joy to some succumb each summer to the touring itch, full many a car is doomed to blush unclean, and waste its sweetness in a highway ditch.—Exchange.

Japanese Make New Footwear

Pat Canvas Tops On Soles Cut From Old Auto Tires

Used auto tires are in great demand in Kona, Hawaii. Three carloads were recently shipped there from Seattle. Japanese make shoes for the natives out of them and sell them for \$1 per pair. Another large shipment is accumulating for the next steamer. Soles are cut from the castings and canvas tops are stitched on. This footwear is said to last from four to six months and generally sells to fishermen and laborers in the sugar and pineapple plantations. The soles are cut symmetrical so that both shoes fit either foot. By changing them about from day to day the wear is equalized.

Fresh Supplies in Demand.—Wherever Dr. Thomas' Electric Oil has been introduced increased supplies have been ordered, showing that wherever it goes, this excellent Oil impresses its power on the people. No matter in what attitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

The Autos More Dangerous

The automobile in the United States last year killed 19,000 people and injured more than 450,000. The railroads carried a passenger load equivalent to giving nine rides to each inhabitant of the country and killed only 149, or only one person in each 3,314,000. Once it was thought that the horse was a vain thing for safety.—Our Dumb Animals.

Minard's Liniment for Dandruff

Alberta Sugar Beets
Sugar beets grown in the Raymond district this year should return about \$1,700,000 at wholesale prices and the net price to the farmer after paying for their labor should be about \$375,000, according to A. E. Palmer, assistant superintendent experimental station. The acreage sown to this crop last spring was approximately 7,000, which works out at a net return of \$53 an acre.

Women Engaged in Agriculture
Over 15,000 Canadian women are actively interested in the industry of agriculture, according to a statement made by Miss Beardmore, Dominion convener of the committee of agriculture of the Federated Women's Institute of Canada. Of this number 1,156 are native-born.

Special rubber insulated gloves and sleeves are now made for the purpose of protecting electrical workers from shock.

Minard's Liniment for Burns

WIGGLIES

after every meal!

Parents: encourage the children to cure for their teeth!

Give them Wiggles! It removes food particles from the teeth. Strengthens gums. Combats acid mouth.

Refreshing and beneficial!

Prepared For Emergencies
As a means of preventing suicides, the casino at Monte Carlo maintains a fund to pay the transportation home of any gambler who has lost all his money.

WHEN THE SYSTEM IS ALL RUN DOWN

Often All That Is Needed Is a Tonic to Build Up the Blood

There are many women who have been invalids or semi-invalids so long that they accept their condition as a life burden. They have endured broken sleep, stomach troubles, nervousness, headaches and weakness so long that they have almost given up enjoying good health. In most of these cases a well chosen diet, fresh air and a tonic to build up the blood would do wonders. To all run-down, nervous people the experience of Mrs. H. J. Cameron, Waterville, Me., will be of deep interest. She says:—"About two years ago I was in a miserable, run-down condition. I was unable to do my work, my head ached day and night, my nerves were all unstrung, and for three weeks I could not eat or sleep. I then decided to give Dr. Williams' Pink Pills a trial and got six boxes. By the time I had used half of them I felt much better, and when I had taken the six boxes I was as well as ever. I could work all day and feel tired and have been strong and healthy ever since. I have never taken any medicine that did me so much good and will always highly recommend Dr. Williams' Pink Pills.

You can get these Pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Particular Work

Men employed to classify and value the diamonds contained in a shipment from the mines usually spend several hours or even a whole day in a darkened room before beginning work, in order that their eyes may be in the best possible condition for examining the stones.

The Friend of All Sufferers.—Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of half a continent of pain—on everywhere and can be found wherever enquired for.

A Difficult Task
"Deep breathing, you understand," remarked the doctor, "destroys milk-crobs."

"But doctor," the patient asked, "how can I force them to breathe deeply?"

For COLIC AND CRAMPS PAINS IN THE STOMACH There's Nothing Equals

It has been in use for over 50 years; its action is pleasant, rapid, reliable and effectual, and relief comes promptly.
"Dad, I want a substitute."
The genuine is put up only by The E. Mulburn Co., Limited, Toronto, Ont.

"He would have slunk back into the friendly gloom of the windfall, but at this moment Gray Wolf came around the end of a great log, followed by Kazan."

but it would never go beyond certain limitations. It would tell him, in time, that his beautiful wolf-mother was blind, but he would never know of that terrible battle between Gray Wolf and the lynx in which his mother's sight had been destroyed. Nature could tell him nothing of Kazan's merciless vengeance, of the wonderful years of their matehood, of their loyalty, their strange adventures in the great Canadian wilderness—it could make him only a son of Kazan.

And then came that wonderful day when the greenish balls of fire that were Kazan's eyes came nearer and nearer, a little at a time, and very cautiously. Hereafter Gray Wolf had warned him back. To be alone was the first law of her wild breed during mothering time; and Kazan had stopped. But on this day the snarl did not come. In Gray Wolf's throat it died away in a low, whimper-

FOR JOY OF GOOD HEALTH

Manitoba Woman Thanks Lydia E. Pinkham's Vegetable Compound

Crandall, Manitoba.—"When I was a young girl I had some very bad periods, and I was not regular. These troubles kept me so tired all the time that I had no strength and no ambition to join in with my friends and have a good time. I was just a poor, miserable always and life just seemed as if it wasn't worth living. I saw no hope in the papers about Lydia E. Pinkham's Vegetable Compound, and then I had a friend who had taken it and told me about it, so I got some. Every month after taking it I got stronger and soon did not suffer every month. It stopped the pains and helped me other ways. Then when my babies were coming I was tired and worn out the first three months and ached badly. I took the Vegetable Compound right along and must say it made a new woman of me and able to do my work, and it helped me through confinement. You see I am a farmer's wife with a big house to look after, and three babies now. I have told over no many women about your medicine. Just last week I got a letter from a friend in the East. Her baby was born fifteen days before mine and she told me she was not feeling very well, her back ached so much, and that she is going to take the same medicine I took. You can use my letter and I hope some one will be helped by it."—Mrs. J. H. Kito, Box 56, Crandall, Manitoba. O

Stony Plain and District.

Mr Gus Zucht, who lives in
the west end of town, had the
misfortune to lose his house
by fire yesterday morning.
Shortly after getting up and
lighting the fire in the kitchen
stove, he noticed his roof was
ablaze. Gus got a ladder and
attempted to quench the flame
by throwing water on it, but
this proved ineffectual. Very
little of the contents were
saved. There was an insur-
ance of \$800.

The North Star Co. now
has a wholesale stock of coal
oils, gasoline, auto and tractor
oils, in Stony Plain.

At Golden Spike, Sunday,
June 7, to the wife of Fred
Hennig, a son.

Mr Selwood, for a number
of years in the employ of the
Gillespie Elevator Co., is the
new agent at Spruce Grove,
succeeding Mr Macalister.

Mr Richard Secord of
Spruce Grove Centre, is visit-
ing at the Saskatoon Fair this
week.

A very delightful dance was
held Thursday evening last
at Mewassin Club house.
The house was well patronized
by those in the district.

The big attraction, Friday,
August 14, will be the dance
at Holborn Hall by Helge
Anderson's famous Orchestra
of Swedish Musicians. Every
dancer should try and bethere,
as this is the treat of the
season.

Hubert S Groves, aged 45,
died in an Edmonton hospital
on Saturday the 25th. Deceased
was a well-known resident
of Tonahawke district, where
he had farmed for a number
of years. The funeral took
place Tuesday to the soldiers'
plot in the Edmonton ceme-
tery.

The Event of the Season

Youth and beauty were
present Thursday night at the
dance in town to celebrate the
return of the newly-weds. Mr
and Mrs Otto Hoffman and
Mr and Mrs Jack Berry from
their honeymoon in the moun-
tains. The hall was well
filled and the music by Barth's
Orchestra was excellent. The
honeymooners received the
congratulations of their many
friends, and the evening proved
to be one of the pleasant-
est ever spent. This far north.
A dainty lunch was served
after midnight, and the other
refreshments were very good
—while it lasted.

The promoters are to be
congratulated on the quiet,
orderly manner in which the
affair was conducted.

winning by 1 to 0 against the
Duffielders. Stony Plain's ball
players were not so fortunate,
Duffield team beating them 10
runs to 9. All the rest of the
events on the card were well
contested, and the picnickers
had a very enjoyable time, a
large crowd being present.

Stony Plain footballers played
a team from the Rotary
club-house on the 28th, and
succumbed to the good play-
ing of the more energetic
youngsters. Score: Stony 3,
Rotary 4. The local team was
entertained at supper after the
game.

Heichen's footballers are
engaged for a match at the
Beach on Sunday August 16
with a Third-Division bunch
from the City.

Messrs Steckle and Loeblich
have gone to Batte, Montana,
to play ball.

The ball game Sunday at
Edmonton Beach between the
Rosenthals and Rotary Boys
resulted in a win for the latter
by 17 to 11. Rosenthals
seemed to be out of practice.

Stony's Senior basketballers
engaged the boys from Ed-
monton Beach on the local
grounds Saturday evening,
and, after some very energetic
play, the score stood 6-6.

Card of Thanks.

Mr A H Schincke wishes
to thank the friends for the
kindnesses shown and ex-
pressives of sympathy given
on the occasion of his re-
cent sad bereavement.

Card of Thanks.

Mr and Mrs John Arm-
bruster and family wish to
thank their many friends for
the beautiful flowers, the
kindness and sympathy shown
them during their recent sad
bereavement.

New Pools Ready to Organise

The new provincial dairy,
livestock and poultry co-op-
erative marketing pools have
now obtained sufficient num-
ber of 5-year contracts for
purposes of organisation. The
provisional boards of all three
pools announce they have ob-
tained more than their mini-
mum objective of contracts,
and that plans are now being
made for the establishment of
the permanent organisations
for the management and oper-
ation of the pools.

Helge Anderson's Orchestra.

Death of a Young Girl.

The death occurred last
week of Caroline Armbruster,
daughter of John Armbruster.
The death occurred in an Ed-
monton Hospital, following an
operation for appendicitis per-
formed 2 days previously.

The funeral took place on
Friday in St. Matthew's
Cnurchyard. A service was
held in St. Matthew's church,
conducted by Rev E. Elmer-
hardt and Rev H J Boettcher.

Caroline was a brilliant
scholar and head of her class
at St. Matthew's School pre-
sided over by Mr Boettcher,
and was very popular with
her school associates, by whom
she will be missed. The fam-
ily has the sympathy of the
entire community in its sad
bereavement.
